I · WON-HYO · THE MONK

Won-Hyo was the monk who brought Buddhism to the Silla court in 686. The diagram is I. You start feet together in the middle of the A–B line facing D: twin forearm blocks, inward knife-hand strikes and side punches to B and A; a bending ready stance and side kick down the stem, three knife-hand guarding blocks and a fingertip thrust; the same block, strike and punch to E and F; then back up toward C with circular blocks, low kicks and punches, a second side kick, and two forearm guarding blocks where you began.

READING THE FOOTPRINTS

Gunnun sogi · walking stance. About 1½ shoulder widths long and one wide, front knee bent over the heel, rear leg straight. Named by the front foot.

Niunja sogi · L-stance. Feet at right angles, about 1½ shoulder widths apart, most of the weight on the bent rear leg. Named by the rear foot: this one, left foot forward, is a right L-stance.

Gojung sogi · fixed stance. Like the L-stance but a little longer, weight even on both legs. Named by the front foot.

Guburyo sogi · bending stance. Stand on the bent red leg, the other foot lifted beside its knee, ready to kick. Named by the standing leg.

Red foot leads; the blue tick is the direction you face. Walking-stance chips are filled; L-stance chips have a double outline. Directions are the ITF letters: you start facing D, with B on your left and A on your right.

PRACTICE NOTES

HOW THE DIAGRAM READS

You start at the centre facing **D**, the bottom of the page, so **B** (your left) is on the right of the page and **A** on the left. The ITF books draw the same diagram from behind you, with D at the top. Figures on the left and right are seen from the side; centre figures face you going toward D and show their back going toward C.
