권 · IL · ONE

Ilyeo is oneness, the heart of the Silla monk Wonhyo's teaching: mind and body, point, line and circle, all become one, and movement starts and ends without deliberate thought. The floor line is 권, the Buddhist manji. You start at its centre and trace its four hooked arms, every turn to the left: a diamond block, a turn, a jump into reverse crane stance, a slow side kick and a high X block, then on to the next arm.

READING THE FOOTPRINTS

- **Ap seogi** · walking stance. One natural step, feet almost in line.
- **Ap kubi** · front stance. About 1½ steps long, one fist wide, front knee bent.
- **Dwit kubi** · back stance. Heels in line, rear foot turned out, weight on the bent rear leg.
- **Ogeum seogi** · reverse crane stance. Stand on the red foot; the other instep presses into the back of the standing knee.
- **Ap chagi** · front kick from the rear leg.

Red foot leads; the blue tick is the direction you face. Front-stance chips are filled. Back-stance chips have a double outline.

PRACTICE NOTES

HOW THE DIAGRAM READS

You start at **na** facing **ga** (the bottom of the page). Figures on the left and right are seen from the side; centre figures face you going toward ga and show their back returning toward na. Horse- and crane-stance figures face the way the body faces.
