土 · JI · EARTH

Jitae is a person with both feet on the ground, kicking, walking and jumping: the struggle of a life lived on the earth. The floor line is 土, a base line for the earth with a short stem rising from it toward the sky. You start on the base line, work out along it to da and to ra, go up the stem toward ga, fight at its far end in horse and crane stance, punch your way back toward na and finish on the base line again.

READING THE FOOTPRINTS

- **Ap seogi** · walking stance. One natural step, feet almost in line.
- **Ap kubi** · front stance. About 1½ steps long, one fist wide, front knee bent.
- **Dwit kubi** · back stance. Heels in line, rear foot turned out, weight on the bent rear leg.
- **Juchum seogi** · horse stance. Feet wide and parallel, knees bent and pushed out.
- **Hakdari seogi** · crane stance. Stand on the red foot; the other foot rests against the standing knee. Named for the standing leg.
- **Ap chagi** · front kick from the rear leg.

Red foot leads; the blue tick is the direction you face. Front-stance chips are filled. Back-stance chips have a double outline.

PRACTICE NOTES

HOW THE DIAGRAM READS

You start at **na** facing **ga** (the bottom of the page). Figures on the left and right are seen from the side; centre figures face you going toward ga and show their back returning toward na. Horse- and crane-stance figures face the way the body faces.
